Exercise 2: Operation Evidence

Course Service

C1. Find All Courses

The screenshot shows the VS Code editor with the REST Client extension. The top panel displays the 'C2. Find Courses by Title' REST client file. The bottom panel shows the JSON response of the GET request, which is a 200 OK status with a response time of 18 ms. The JSON data lists two courses: 'Night Photography' and 'Sports Photography', each with details like instructor, enrollment, description, price, and location.

C3. Find Courses by Instructor

The screenshot shows a REST client interface with a sidebar on the left containing a list of collections. The main area displays a GET request to the endpoint `{(course_url)}/courses?instructor=Instructor2@uoc.edu`. The response is a 200 OK status with a JSON body containing course details.

M4. Get Microcredential by ID

The screenshot displays a REST client interface with a workspace titled "M4. Get Microcredential by ID - My Workspace". The left sidebar shows a collection of API endpoints under "PRAC2 SA - Photo&Film4You > Microcredential Service". The selected endpoint is "M4. Get Microcredential by ID". The main panel shows the request details for a GET request to the URL "({micro_url})/microcredentials/1". The response is a 200 OK status with a response time of 13 ms and a body size of 450 B. The response body is displayed in JSON format, showing a single microcredential object.
